CHEMCORA | Company Profile

Reliable supply solutions for industrial business.

CHEMCORA is focused on serving industrial and commercial buyers with dependable chemical sourcing and supply solutions. The business is built around supply reliability, documentation support, responsive coordination and practical business understanding. Alongside the industrial chemical business, CHEMCORA is developing XEROTIC®, its moisture-control solutions brand for packaging protection, logistics safety and storage performance.

Our business model

- Requirement-based sourcing aligned to customer grade, quantity, packaging and delivery location.
- MOQ-based and recurring supply support for industrial and commercial buyers.
- Packaging and dispatch coordination with practical logistics planning.
- Documentation-aware supply, including MSDS and other product records as applicable.
- Domestic-ready supply with an export-capable operating approach.

Our positioning

Industrial Chemicals	XEROTIC® Moisture Control
Bulk sourcing and supply of industrial chemicals, solvents and application-driven products.	Silica gel, container desiccants, clay desiccants and anti-moisture solutions for packaging, storage and logistics.

Industries we serve

Pharmaceuticals • Paints & Coatings • Printing & Packaging • FMCG Manufacturing • Chemical Processing • Logistics & Export Cargo • General Industrial • Export Packaging

Portfolio Overview

Core products currently presented across CHEMCORA and XEROTIC®.

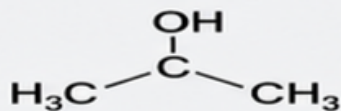

CHEMCORA — Industrial Chemicals	Primary industrial supply portfolio
IPA (Isopropyl Alcohol)	Industrial solvent
Acetone	Industrial solvent
Methanol	Industrial solvent / process chemical
LABSA	Detergent & cleaning chemical
XEROTIC® — Moisture Control	Moisture protection portfolio
Silica Gel Sachets	Packaging moisture absorber
Container Desiccant Bags	Cargo / container moisture control
Clay Desiccants	Cost-effective moisture control
XEROTIC® AMP-100	Anti-moisture additive for plastic recycling

Additional industrial solvents and chemicals can be sourced against specific requirements.

IPA (Isopropyl Alcohol)

1. ISOPROPYL ALCOHOL (IPA)

Formula: C_3H_8O

Product overview

Industrial-grade IPA (CAS 67-63-0) for solvent, cleaning and process applications where consistent quality and dependable supply coordination are important.

Common applications

- Pharmaceutical processing
- Sanitizer manufacturing
- Electronics and PCB cleaning
- Surface cleaning and degreasing
- Industrial cleaning

Supply & packaging

Drum / bulk formats. Exact grade, packaging, MOQ and quantity are confirmed against the customer RFQ.

Key benefits

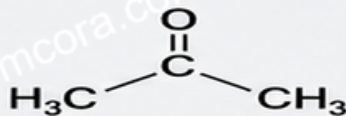

- Versatile industrial solvent
- Recurring supply support
- Documentation support where applicable

Catalogue note: The product visual shown is the customer-supplied CHEMCORA image.

Acetone

2. ACETONE

Formula: C_3H_6O

Product overview

Industrial-grade Acetone (CAS 67-64-1) for solvent, cleaning, coatings, plastics and allied manufacturing applications.

Common applications

- Paints & coatings
- Plastics and processing
- Cleaning and degreasing
- Adhesives and resins
- Chemical and pharmaceutical processes

Supply & packaging

Drum / bulk formats with MOQ-based commercial supply.

Key benefits

- Broad industrial use
- Commercial sourcing support
- Recurring order coordination

Catalogue note: The product visual shown is the customer-supplied CHEMCORA image.

Methanol

3. METHANOL

Formula: CH_3OH

Product overview

Industrial-grade Methanol (CAS 67-56-1) for chemical manufacturing, processing and related commercial applications.

Common applications

- Chemical manufacturing
- Biodiesel-related processing
- Pharmaceutical intermediates
- Industrial processing
- Formaldehyde production

Supply & packaging

Bulk / drum and commercial supply options; MOQ-based sourcing.

Key benefits

- Industrial sourcing support
- Recurring demand coordination
- Documentation assistance where applicable

Catalogue note: The product visual shown is the customer-supplied CHEMCORA image.

LABSA 90%

Product overview

Linear Alkyl Benzene Sulphonic Acid used primarily in detergent, cleaning-product and surfactant manufacturing.

Common applications

- Detergent powder and liquid manufacturing
- Soap and cleaning formulations
- Industrial cleaning products
- Specialty cleaning products
- Allied chemical processing

Supply & packaging

Bulk / drum and commercial supply options; concentration and packing are confirmed per RFQ.

Key benefits

- Formulation-oriented supply support
- Recurring manufacturing requirements
- Commercial coordination

Catalogue note: The product visual shown is the customer-supplied CHEMCORA image.

XEROTIC® | Moisture Control Solutions

Protecting products, packaging, machinery and cargo from moisture-related risk.

XEROTIC® is CHEMCORA's moisture-control solutions brand. Its portfolio is designed around practical moisture management for product packaging, storage, shipping containers and plastic recycling applications.

	Silica Gel Sachets Compact moisture absorption for packaged goods. Packaging • Electronics • Footwear • Machinery
	Container Desiccant Bags Cargo moisture protection for long-distance container transit. Export Cargo • Containers • Logistics
	Clay Desiccants Cost-effective moisture control for storage and industrial goods. Warehousing • Packaging • Machinery

Silica Gel Sachets

Product overview

XEROTIC® silica gel sachets are designed to absorb excess moisture and help protect packaged goods from humidity-related damage during storage, packaging and movement.

Common applications

- Electronics and components
- Footwear and leather goods
- Pharmaceutical packaging
- Machinery components
- Cartons, boxes and parcels

Supply & packaging

Common sachet sizes include 1 g, 2 g, 5 g and 10 g; custom and bulk requirements can be discussed.

Key benefits

- Compact and easy to place
- Moisture absorption for enclosed packaging
- Multiple size options
- Suitable for commercial and industrial use

Catalogue note: The product visual shown is the customer-supplied XEROTIC image.

Container Desiccant Bags

Product overview

XEROTIC® container desiccant bags are designed to help reduce condensation and moisture-related cargo damage in shipping containers and closed logistics environments.

Common applications

- Export shipments
- Container cargo protection
- International logistics
- Industrial transport packaging
- Long-distance goods movement

Supply & packaging

Standard bag formats and bulk commercial supply; quantity is selected based on container type, cargo and shipment conditions.

Key benefits

- Helps reduce container moisture risk
- Suitable for long transit
- Easy to hang or place inside containers

Catalogue note: The product visual shown is the customer-supplied XEROTIC image.

Clay Desiccants

Product overview

XEROTIC® clay desiccants provide a practical and commercially efficient moisture-control option for packaging, storage and industrial goods protection.

Common applications

- Industrial warehousing
- Machinery packaging
- Industrial goods and components
- Storage boxes and cartons
- General packaging protection

Supply & packaging

Standard sachet formats and bulk supply; recurring commercial orders can be supported.

Key benefits

- Cost-effective moisture-control option
- Simple application
- Suitable for multiple packaging formats

Catalogue note: The product visual shown is the customer-supplied XEROTIC image.

XEROTIC® AMP-100

Product overview

AMP-100 is a moisture-control additive positioned for plastic recycling and processing applications. It is intended to help manage excess moisture in recycled plastic material and support processing performance.

Common applications

- Plastic recycling factories
- Granule manufacturing units
- Injection molding
- Extrusion processing
- Plastic product manufacturing

Supply & packaging

25 kg industrial bags; custom packaging can be discussed. Typical dosage may be around 1%–3%, subject to polymer, moisture content and process conditions.

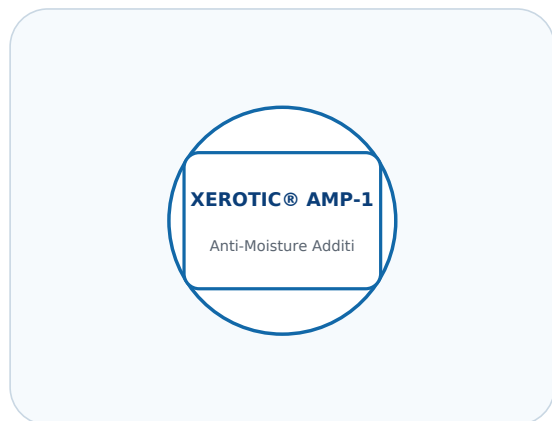

Key benefits

- Helps reduce excess moisture
- May reduce bubbles, cracks and surface defects
- Supports molding and extrusion performance
- Industrial B2B supply

Catalogue note: The product visual shown is the customer-supplied XEROTIC image.

ANTI-MOISTURE ADDITIVE FOR PLASTIC RECYCLING

XEROTIC® AMP-100

Product overview

AMP-100 is a moisture-control additive designed for plastic recycling and processing. It helps reduce excess moisture in recycled plastic granules and can improve processing performance.

Common applications

- Plastic recycling factories
- Plastic granule manufacturing units
- Injection molding units
- Extrusion processing plants
- Plastic product manufacturing

Supply & packaging

25 kg bags; custom packaging available on request.
Typical dosage: 1%–3%, subject to material and process conditions.

Key points

- Helps reduce excess moisture
- Can reduce bubbles, cracks and surface defects
- Supports molding and extrusion performance
- Helps improve finish and production stability

Commercial note: Dosage should be evaluated against moisture content, polymer type and processing method.

Supply, Logistics & Documentation

Structured coordination from requirement to delivery.

How we work

- Requirement capture: product, grade, quantity, packaging and delivery location.
- Source matching: identify suitable supply route and commercial option.
- Commercial coordination: quotation, MOQ and delivery planning.
- Packaging coordination: standard or requirement-based packing where available.
- Documentation: MSDS and other product records coordinated as applicable.
- Dispatch coordination: domestic-ready and export-capable supply planning.

Quality & compliance approach

- Documentation-aware B2B supply.
- Product records and MSDS support as applicable to the product and source.
- Clear communication on grade, packing and commercial terms.
- Batch-specific documentation where provided by the supply source.
- Safe handling and labeling considerations for applicable products.

Important commercial principle

CHEMCORA is a sourcing and supply business. Product availability, exact specification, packaging, MOQ, lead time and documentation are confirmed against each customer requirement and supply source. This catalogue is for general commercial guidance and is not a substitute for the product-specific TDS, SDS or COA.

Request a Quote

Send your requirement and our team will coordinate suitable supply details.

1	Product name / grade
2	Required quantity
3	Preferred packaging
4	Delivery location
5	Application / end use
6	Required delivery date
7	Documentation required (TDS / SDS / COA etc.)
